BECOME BUSY 2.0

BB2.0 Project

The key priority of this project is to support young entrepreneurs by providing them with enhanced tools and resources. It addresses the challenges faced by young people, especially in the aftermath of COVID-19, and aligns with the European Commission's recovery plan. The project helps young entrepreneurs develop their innovative ideas into viable businesses.

Two learning activities will take place: C1 training for 24 youth workers in pre-incubation tools and resources, and C2 mentoring and coaching for 24 young people with business ideas, introducing them to the pre-incubation strategy and supportive tools.

Closing Meeting in Thessaloniki, Greece

The Closing Meeting, the third Transnational Project Meeting, was held in Thessaloniki as a hybrid event. Representatives from partner organizations evaluated project outcomes, finalized Intellectual Outputs, assessed results of Multiplier Events, and reviewed overall progress.

The Sustainability Plan and impact on target groups were addressed, and tasks were assigned for the Final Report. The meeting marked an important milestone in concluding the project and paving the way for future endeavors.
